

MID-STATE MACHINE AND FABRICATING CORPORATION

2730 Mine and Mill Road • Lakeland, Florida 33801
(863) 665-6233 • Fax (863) 667-1103

After interviewing a number of central Florida IT consulting firms, Mid-State Machine and Fabricating Corporation contracted with Data Integrity Services to perform a high level Microsoft upgrade of their Exchange email server and domain controller. Data Integrity Services provided the management services needed to migrate the servers, upgrade the email system and DNS services, add additional email functionality, and create an optimized rollout plan for existing workstations to keep downtime to an absolute minimum. I was extremely satisfied with the solutions and resources provided. "Data Integrity Services both met and exceeded my expectations. Our project came in under budget and on time with no interruption to work flow".
